

## **PYTON IS SEEKING A CONTENT SPECIALIST WITH DEVELOPMENT SKILLS**

Are joining our passion for travel, like to puzzle and turn issues into challenges? Be our superstar and fly with us to grand achievements and (personal) success!

### **What you tell your friends on a party:**

“I ensure that you can fly low cost!”

### **What you actually do:**

The Content Specialist is responsible for implementing, maintaining and processing data. The main task is to receive data from different websites and APIs by using our in-house software or developing software components in order to ensure correct data, prices and packages.

### **Your profile:**

- Bachelor degree in IT-technology or equivalent practical experience
- Profound knowledge of JavaScript, html/s and front-end development frameworks desirable
- Basic programming skills and experience with JSON and XML
- Knowledge of server communication and internet protocols
- Team player and also have the ability to work on own initiative
- High sense of personal responsibility and taking ownership
- Result-driven and flexible
- Affinity with new technologies
- Experience in API web services is preferred

### **We offer:**

- Competitive remuneration package
- 25 holidays (if you promise to return)
- a dynamic, entrepreneurial & international environment
- nice, helpful and talented colleagues
- space to share your new, innovative ideas
- a vibrant work location

Please be invited to contact Charleen Visser, People & Culture advisor, for more information about the role: +31 6 21641084 or [c.visser@pyton.travel](mailto:c.visser@pyton.travel)

We are looking forward to your application! #Let's shape the future of travel
