

## PYTON IS SEEKING AN INNOVATIVE DEV/OPS

Are you ready to innovate new & existing products and incubate new business with dedicated development resources and great sales teams to ensure new business breakthroughs?

### What you tell your friends on a party:

“Have you ever booked your travel online? Well, I am the one that makes it possible for you to quickly book by taking care of the software & hardware!”

### What you actually do:

Providing effective installation/ configuration, operation and maintenance of systems hardware & software and related infrastructure. Assisting project teams with technical issues in the initiation and planning of our Agile development methodology. Participating on projects focused on a smooth project transition from development staff to production by performing operations activities within the project life-cycle. Define needs, benefits and technical strategy, research & development within the project life-cycle, technical analysis and design. Provide support per request from various customer & internal departments. Accountable for hard- and software systems and monitoring systems that supports IT-infrastructure. Perform daily system monitoring & backup installations, investigate and troubleshoot issues. Repair and recover from hardware or software failures. Engineering of System administrator-related solutions for various project and operational needs. Install new and/or rebuild existing servers and configure hardware & configure systems. Develop and maintain installation, maintenance and support configuration procedures. Functions as a lead-worker doing the work similar to those in the work unit; responsibility for training, instruction, setting the work pace, and possibly evaluating performance. Interpret and/or discuss information with others, which involves terminology or concepts not familiar to many people; regularly provide advice and recommend actions involving rather complex issues. May resolve problems within established practices.

### Your profile:

- Bachelor degree with a technical major, such as engineering or computer science or equivalent practical work experience
- Windows; Linux, SQL DB, office applications (e.g. Outlook.Exchange,Office365)
- IT-infrastructure systems as IIS/firewall/load balancer/DB server
- Knowledge about VMWare, cloud solutions, Elastic Search & MongoDB
- Profound knowledge about the continuous integration, delivery & deployment approach and about software containerization platforms like e.g. Docker
- Ability to work calmly and efficiently under pressure
- Strong problem diagnosis and multi-tasking skills
- Team player and also have the ability to work on own initiative
- Affinity with new technologies
- Be available for ad hoc standby support outside office hours
- Experience in virtualization and cloud solutions would be an asset
- Systems Administration/System Engineer certification in Microsoft
- 3-5 years' work experience in similar role

**We offer:**

- competitive remuneration package
- 25 holidays (if you promise to return)
- a dynamic, entrepreneurial & international environment
- nice, helpful and talented colleagues
- space to share your new, innovative ideas
- a vibrant work location

Please be invited to contact Charleen Visser, People & Culture advisor, for more information about the role: +31 6 21641084 or [c.visser@pyton.travel](mailto:c.visser@pyton.travel)

We are looking forward to your application! #Let's shape the future of travel
