

PYTON IS SEEKING A CREATIVE & EXPERIENCED FRONT-END DEVELOPER

What you tell your friends on a party:

“Have you ever booked your holiday online? Well, I am the one that makes it possible for you to quickly book the holiday of your dreams! Together with my team, I am working on leisure projects critical to the needs of our organization and customers. We translate customer needs and build these into a responsive and elegant web- & mobile application while strictly following the code guidelines. I ensure quality through unit tests and peer review code. Actively participate in the building of the platform & constantly looking for improvements is key in my role!”

What you actually do:

Let's start with a good cup of coffee and chat with your colleagues about the weekend & the ideas you have about building an efficient team committed to innovation. At 10 AM you'll have your daily standup, because you are working with your team according to Scrum/Agile methodology. You design and implement new user interfaces in Pyton Leisure products, build libraries and frameworks that support large, complex web (and in the near future mobile) applications, optimize web applications to maximize speed and scale. Support divers clients from high powered desktop computers to small footprint mobile devices, write client-side code for web-based applications, create fast - easy to use - high volume production applications and develop prototypes quickly. Help in building an efficient team committed to innovation, challenge and motivate team members on their performance, continues integration of re-useable components.

Your profile:

- Bachelor degree in Computer Science or equivalent practical experience
- Programming skills in C#, Javascript, HTML, CSS
- Experienced with AJAX, Angular, JQUERY
- Knowledge of Sass and Gulp is preferred
- Affinity with new technologies
- Strong problem diagnosis skills
- Knowledge of responsive web- an mobile development
- Team player and also have the ability to work on own initiative
- Experience with AGILE methodologies of development

We offer:

- Competitive remuneration
- 25 holidays (if you promiss to come back)
- a dynamic, entrepreneurial & international environment
- nice, helpfull and talented colleagues
- space to share your new, innovative ideas
- a vibrant worklocation

Please be invited to contact Charleen Visser, People & Culture advisor, for more information about the role: +31 6 21641084 or c.visser@pyton.travel

We are looking forward to your application!
